

SEED · \$42 MILLION

We Don't Just Save Lives. We Restore Them.

Dual-use rescue infrastructure: aerial fire response, autonomous security swarms, exo-armor, heavy mechs, and DNA-matched tissue regeneration.

rescueforce.tech · info@rescueforce.com

THE PROBLEM

Land travel is the bottleneck that kills.

Traffic & gridlock

Firefighters and ambulances share one obstacle: the street. Minutes lost in congestion are lives lost in high-rises, freeways, and wildfire zones.

First response is not restoration

Today's tools stabilize a scene. They do not regenerate faces, limbs, or organs. Survivors are left with lifelong damage.

No dual-use stack

Civilian rescue, municipal fire, defense readiness, and space construction are bought as separate, slow systems.

THE SOLUTION

One force. Civilian rescue today. Space and defense readiness tomorrow.

Air

SkyForge vessels suppress high-rise and wildfire from above, refill mid-mission, and extract vehicles or people without ground traffic.

Ground

Phoenix exo-suits and Titan mechs put armor and heavy lift on the operator and on the rubble line.

Swarm

Hornet AI bots arrive in minutes from a citizen emergency signal, record 4K evidence, and hold a deterrent perimeter.

Biology

Age-matched, DNA-mirrored tissue and organ regeneration — frontier science we are committed to making real.

SEVEN PROGRAMS

One unified product family.

01

Hornet AI Swarm

One-button aerial security and evidence capture.

02

SkyForge Vessels

VTOL fire suppression; Colossus for wildfire fronts.

03

2.0 Lifter

Same airframe. Mid-air vehicle and casualty extraction.

04

Titan MechBot

12–18 m ground rescue, winched from Colossus.

05

Phoenix Exo-Suits

CVD diamond armor for firefighters and rescuers.

06

Space Construction

Lunar/zero-g Titan mechs for habitats and hulls.

07

Tissue Regeneration

DNA-matched faces, limbs, and organs.

SKYFORGE FLEET

One airframe family. Infinite mission profiles.

Urban	Hover 50–100 stories. Water and foam into burning floors.
2.0 Lifter	Magnetic car-lift arms and stretcher pods. Direct-to-ER.
Colossus	50,000 L retardant. Wildfire fronts. Ocean refill < 90s.
Colossus Mk II	12-hour sorties, ceramic heat shield, tanker refuel.

BIOLOGICAL BREAKTHROUGH

From trauma to full restoration.

Frontier science: reactivate a patient's own stem cells and mirror their DNA. Age-matched. Rejection-free. Still early. We are building toward it.

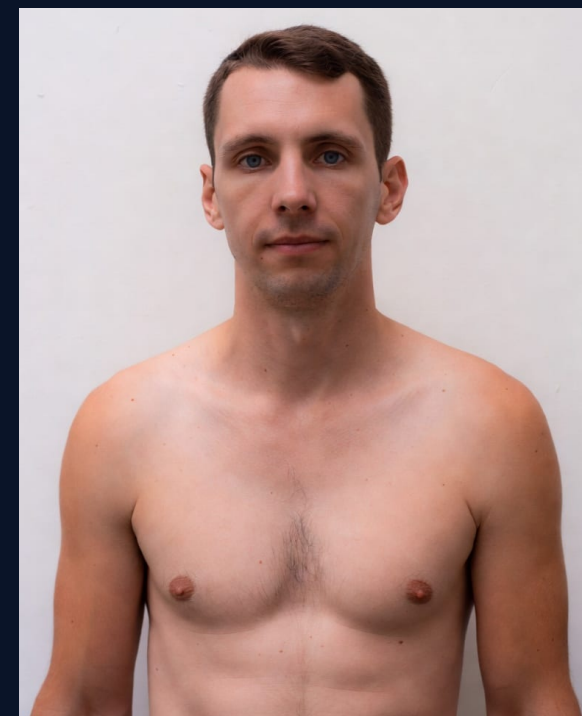

Before — severe burn

After — DNA-matched restore

Before — amputated arm

After — limb regrown

BUYERS

Who pays for a rescue force.

- | | | |
|----|-----------------------------|---|
| 01 | Municipal government | City fire, EMS, and high-rise protection contracts. |
| 02 | Emergency services | Fleet leasing for wildfire and disaster surge. |
| 03 | Defense | Dual-use readiness: same platforms, contested environments. |
| 04 | Insurance | Loss prevention when minutes of aerial response cut claims. |
| 05 | Space infrastructure | Construction mechs as the next market after Earth rescue. |

ROADMAP

Prototype to planet-scale rescue.

2026

Drone network + first SkyForge vessels. Seed close. Exo-suit alpha.

2027

Lifter module. Titan walking prototype. Hornet field trials.

2028

Exo-suits in 50 stations. Hornet operational. 100+ SkyForge units.

2029

First regen clinic. FDA Phase I skin. Titan operational deploy.

2030

Lunar mech trials. Global fleet leasing. Series C / IPO prep.

2032

Full organ regen path. Autonomous rescue. 1M+ lives / year goal.

FINANCIALS

Plan of record. Not a guarantee.

\$42M

Seed target

\$68M

Year 2 revenue

\$214M

Year 3 revenue

\$1.2B

Year 5 revenue

Revenue is projected from municipal and federal fleet programs, dual-use defense, insurance partnerships, and later space-construction work. Figures assume successful development, certification, and procurement. They will change.

Model is directional for this raise. Full build, unit economics, and use of proceeds in the data room.

THE ASK

\$42 million seed.

Unlocks first-city drone coverage, SkyForge vessels in service, exo-suit alpha, and the lab path to tissue regeneration.

Vehicles & airframes

SkyForge prototypes, lifter module, ground test

Swarms & software

Hornet coordination, app, city dispatch HQ

Suits & mechs

Phoenix alpha, Titan walking prototype

Biology

Tissue program, preclinical path toward clinic

People & ops

Engineering, flight test, regulatory, BD

**Because no life should be left
to low-tech mercy.**
